Education

B.Sc. (Honours) in Architecture and Planning
(Architectural Design)

Sudan University of Science & Technology -
College of **Architecture and Planning**

- Award Date: December 2025.
- Class of Award: **First Class.**
- Cumulative Aggregate: **3.01.**

Professional Skills

Crisis Management & Agile Decision-Making: Highly adaptable with a proven capacity to take rapid, calculated actions and decisive steps under pressure to resolve unexpected project blocks or site conflicts efficiently.

Swift Consensus & Negotiations: Adept at fast-tracking agreements between conflicting parties (suppliers, contractors, or team members) to ensure tasks are delivered without project stagnation or delays.

Professional Confidence: Recognized for maintaining a proactive attitude and excellent command in high-stakes operational and construction environments.

Objective

A highly motivated **Architectural Engineer** with a **Bachelor of Science (Honours)** from Sudan University of Science & Technology. Graduated with **First Class honours** and a cumulative **GPA of 3.01**. Seeking to leverage my strong academic foundation, field training experience in Oman, and extensive proficiency in architectural and design software to contribute to innovative engineering projects and professional site management.

Academic Projects

Throughout my five-year academic journey, I designed a diverse range of complex architectural projects:

- **Residential & Commercial:** Residential Buildings, **5-Star Hotel**, and Shopping Mall.
- **Healthcare & Industrial:** Diagnostic Hospital, **General Hospital**, Medical City Planning, Health Center, and Factory.
- **Public & Recreational:** Administrative Building, Recreational Center, and Workshop Technology projects.
- **Graduation Project:** An Innovative School (Two Stages) including Teachers' Housing, covering a total area of **38,000 M²**

Technical Workshops & Advanced Drafting

Focused on advanced technical proficiency during the fourth and fifth years:

- **Technical Design:** Developed advanced working drawings and technical details for a Diagnostic Hospital.
- **Construction Technology:** Mastered professional execution drawings, structural systems, and material specifications.
- **Workshops:** Completed intensive practical workshops in Workshop Technology (1-2) and Building Systems.
- **Applied Skills:** Gained expertise in measurements, specifications, and building legislation.

TRAINING

Trainee Architect

Al-Hilal Engineering Consultancy — Al-Khoud

Sep 2024 – Oct 2024
(40 Days)

- **Site Supervision:** Monitored construction progress and ensured compliance with architectural specifications.
- **Site-Office Integration:** Gained experience in bridging the gap between design office concepts and on-site implementation.
- **Evaluation:** Achieved "Excellent" rating in work capability and professional confidence.

Additional Work

Supply Chain & Operations Manager

Company : Next Commerce (E-commerce Platform **مكان اللبان**)

January 2024 – May 2026

- **Strategic Procurement & Vendor Management:** Managed end-to-end purchasing operations, verified international suppliers, and negotiated directly to secure immediate, cost-effective agreements and swift bank transfers.
- **Global Sourcing & R&D:** Conducted market research to innovate custom packaging solutions, managing direct sourcing pipelines via Alibaba (China) with fast turnaround times.
- **Inventory Control & Quality Assurance (QA):** Enforced rigorous quality control protocols and handled rapid vendor adjustments to correct defects instantly, backed by weekly and monthly physical audits.
- **Cross-Border Logistics:** Orchestrated time-sensitive logistics and fulfillment chains across the Gulf (GCC) region, utilizing rapid decision-making to bypass customs and transit bottlenecks.
